

DRIFTER HAMMOCK FRAME

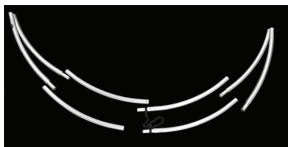

TOOLS NEEDED

No Tools Needed

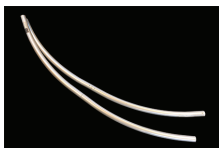

INSTALLATION INSTRUCTIONS

1. Remove DRIFTER from carry bag

2. Lay the FRAME (A, B) out on the ground, in the position they will be assembled: connected pieces toward the end and larger couplers in the center of the assembly.

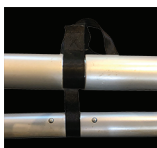

3. Using the CONNECTORS, connect the end pieces first, making sure all four spring pins engage with the holes in the receiving tubes.

4. With the safety strap in place, between the two spring pins on the center coupler, connect the two halves. There will be a gap that holds the safety strap between the bottom frame pieces.

DO NOT USE DRIFTER WITHOUT THE CENTER SAFETY STRAP

5. Stand the DRIFTER up and hang your hammock.

USAGE NOTES

- Never enter hammock feet first
- Do not let hammock swing past the frame, or it may collapse
- Do not sit back into hammock, only downward
- Always use center strap or hammock may collapse

PARTS LIST

A - 2 x FRAME END

B - 4 x FRAME MIDDLE

C - 1 x SAFETY STRAP

D - 6 x CONNECTOR
